

clsacrovyn® Wall Protection

Project Information

Project:
Lakeside Hospital

Location:
Omaha, NE

Architect:
Leo A. Daly

Product:
P-OMW Handrail
Custom Wall Panels

Project Overview

Lakeside Hospital was designed as a high-tech medical facility that would be warm and inviting to all occupants. Natural wood and metal materials are found throughout this building. The architect wanted to use real wood and metal handrails which no manufacturer offered. C/S designed and developed a custom handrail system in time to meet the short project schedule. Protecting the walls from abuse, the private patient rooms feature custom designed headwalls with real wood and metal wall panels that incorporate all the necessary electronic devices.

Custom real wood and metal wall panels
