

**CS**™ Acrovyn® Wall Panels

*Reset Your Standards*

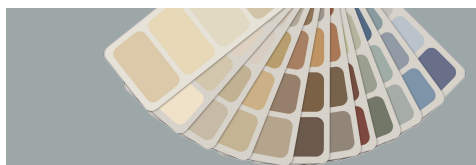

# Hildabrant & Co.

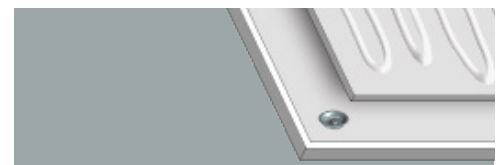

The Acrovyn Wall Panel system provides designers the opportunity to reset their standards with extensive new design selections. See below to learn how Acrovyn Wall Panels have been reimagined to suit your interior needs.

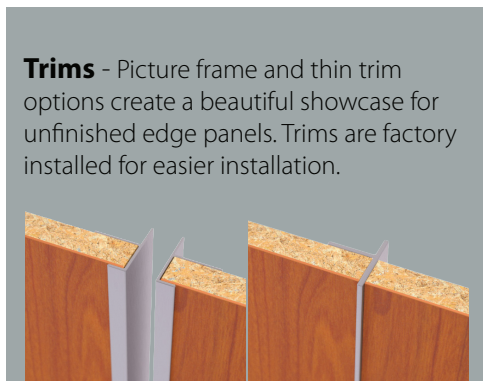

**Panel Edge** - Choose from wrapped beveled, wrapped square or unfinished edges. Unfinished edges are recommended for use with trims.

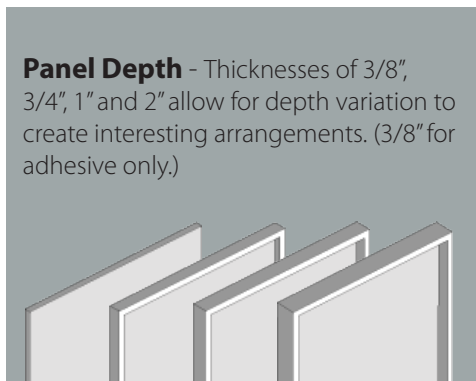

**Finish Options** - Acrovyn Wall Panels boast an impressive collection of finish options with Acrovyn solid colors, Chameleon™ simulated patterns and Acrovyn by Design® embedded digital imagery.

**Mounting Options** - The Sure Snap™ System cuts installation in half, allowing for design flexibility and depth variation. Permanent adhesive is also available.

**Trims** - Picture frame and thin trim options create a beautiful showcase for unfinished edge panels. Trims are factory installed for easier installation.

**Panel Depth** - Thicknesses of 3/8", 3/4", 1" and 2" allow for depth variation to create interesting arrangements. (3/8" for adhesive only.)
