

CS Entrance Mats + Grids Cradle to Cradle Certified™ Silver v3.1 Specification Sheet

Construction Specialties' architectural Entrance Mats + Grids has become the industry standard since its introduction 40 years ago. Architects, designers, facility manager, and owners prefer our entrance flooring because of its proven ability to stop dirt and water from being tracked into a commercial building.

Cradle to Cradle Certified™ levels achieved by CS Entrance Mats + Grids products are based on the lowest assessment level of model variations and selected finishes. Review each model's notes to see if optional items could lower its certification level. In some cases, there are non-certified model variations that are exceptions to current certification. For descriptions and details on individual product models, visit www.c-sgroup.com/efs.

The following models and finishes are considered Cradle to Cradle Certified™ Silver within the scope of certification #3211 valid August 1, 2017 to July 31, 2019.

Models Approved:
